Novelty:

None of the citations, or any obvious combination of them, disclose all of the features defined in your claims 1 to 19. In particular the features of encoding words by identifying a plurality of different vowel sounds, representing each different vowel and the letters forming a vowel sound, by a first and second indicia furthermore using five indicia covering different sounds of letters in a word whereby a word is represented by a combination of the first to fifth indicia. As such the claims are considered to be both novel and inventive in light of these documents.

The claims are considered to satisfy the industrial applicability criterion in the field of teaching aides:
